

## **JOB DESCRIPTION**

**Position Title: Business Information Analyst**

**Role type: Permanent**

**Location: London**

Join our fast-growing Infrastructure & Energy Group, bringing your analytical expertise and flair to acquire, analyse, archive and present commercial data for our Business Development and Marketing Communications teams.

You will work closely with our Green Investment Group (GIG) – winners of the Europe Wind Deal of the Year (PFI Awards, 2017), and Bioenergy Deal of the Year (Environmental Finance, 2017). GIG is at the forefront of our presence in the growing and dynamic renewable energy sector, on a mission to accelerate the global transition to a greener economy. They are a leading principal investor in green infrastructure, having committed or advised on over £10bn of investment into offshore wind, onshore wind, solar, waste, bioenergy, battery storage, energy efficiency, district heating, hydro and interconnectors.

Reporting to the Head of Policy, you will play a critical role in the development of datasets and systems that will inform external business communications and marketing plans, as well as management reporting. As a highly numerate and disciplined executive, you will have ownership of key business transaction and performance information; contributing directly to the global brand and future direction of Macquarie and GIG businesses.

Organised and proactive in your approach, you will bring high attention to detail in your collation of qualitative and quantitative data via systems and stakeholders at various levels within the business. You will possess strong excel skills and experience of ensuring the integrity and accuracy of data. An interest in business development and marketing collateral within the energy investment space would be advantageous, but not essential.

Leveraging your 2-3 years' experience within a corporate, commercial or public sector organisation, you will be curious to undertake the challenge of data management and interpretation in a fast-paced and dynamic environment. You will bring an excellent academic background with a minimum 2:1 university degree, or post graduate qualification, in a relevant subject with a strong analytical dimension.

If you are ready to start a new and exciting chapter in your career, please apply online.

Macquarie Capital provides advisory and capital raising services to corporate and government clients involved in public mergers and acquisitions, private treaty acquisitions and divestments, debt and equity fund raising and corporate restructuring. It also undertakes principal investing activities globally in support of its client activities.

Advisory activities are divided into industry groups, reflecting key areas of expertise. With staff in 37 offices across 22 locations, Macquarie Capital is a truly global business. A role in the team will expose

you to a dynamic working environment and the opportunity to contribute to high-profile transactions whilst working in a business with the best people in the industry.
